Topic: Review: Township Mobile Game

Speaker: Personal | Notebook: Mobile Games

I am not really a fan of mobile games because I just dont have the patience really. I once played Pacman, Super Mario, Angry Birds or Temple Run before and I remembered it was fun

Lately, family members introduced me to this mobile game, Township, since they are fellow players too and I am hooked.

You can build your town with buildings, roads, farm, mine, parks, zoo and etc and more. You get to join your friends (or family too!) to play the game.

Whether you are an Apple or Android user, you can get this mobile game and if you are that super hooked, you can do more by paying in-game purchases.

So, this one is fun!
