Topic: 17. DRF Ordering / Sorting

Speaker: Personal | Notebook: API Development using Django Framework

---

1. This comes from the REST_FRAMEWORK.FILTERS. Update the API\VIEWS.PY as:

Update the BlogsView class:

2. Run your browser and you can view the IDs in ascending or descending order.

3. You can also sort by blog_title:

4. Just like the SEARCH_PARAM where we override it with our own label, we can do the same thing for ordering, we use the ORDERING_PARAM. Add this in our SETTINGS.PY:
